

MastiskhNet

AI-Powered Brain Tumor Detection & Analysis System

MastiskhNet is an AI-powered clinical decision support platform that uses a deep learning model (Attention U-Net 3D) to analyze brain MRI scans, detecting, segmenting, and quantifying brain tumor regions. The system provides doctors with automated tumor segmentation, interactive 3D visualization, volumetric statistics, and detailed diagnostic reports to support clinical decision-making.

Through the MastiskhNet mobile application, patients can securely view their MRI analysis results, review their tumor segmentation and 3D models, communicate directly with their assigned doctor, and track their diagnostic history over time.

Patient Portal Access

A MastiskhNet mobile account has been created for you. Please download the MastiskhNet app and log in using the credentials below. For your security, please change your password immediately after your first login using the 'Change Password' option inside the app.

Patient Name:	Rajiv Singh
Date & Time of Visit:	2026-07-30 06:13 PM
Doctor:	Bharat Sharma
Mobile App Login ID (Email):	singhrajiv18110922@gmail.com
Mobile App Temporary Password:	Dqbbm6toXY
